

Sean McCracken

Senior Software Engineer

sean.mccracken.dev@gmail.com • 515.520.4041 • linkedin.com/in/seantmccracken • Remote / Des Moines, IA

Summary

Senior Software Engineer with 9+ years of experience building enterprise-scale web applications in C#, .NET, and .NET Core for a Fortune 500 healthcare organization. Proven remote collaborator with deep expertise in SQL Server, role-based access control, REST APIs, CI/CD, and test automation. Experience leading full software development lifecycles on distributed Agile teams, with a strong background in both engineering and quality assurance. Open to remote senior engineering roles.

Experience

HCA Healthcare (via UST) – Remote

Enterprise contractor embedded full-time within HCA's engineering organization, supporting a nationwide role-based access and purchasing platform used across thousands of healthcare facilities.

Senior Software Engineer (UST title: Lead – Software Engineering) 01/2020 – 02/2026

- Architected and maintained a nationwide .NET role-based access control platform serving thousands of HCA Healthcare facilities, managing secure sign-in and permissions for a large internal user base across purchasing and pricing systems
- Implemented comprehensive audit logging for all user sign-ins and system changes, supporting HIPAA-aligned access controls and providing a full compliance trail across HCA's internal user network
- Designed and optimized SQL Server data solutions including views, stored procedures, SSIS packages, and query tuning to ensure high-performance, accurate access to pricing and purchasing data at enterprise scale
- Built monitoring and reporting automation to proactively detect application, data, and integration issues in production, reducing time-to-detection for incidents across a nationally distributed system
- Partnered directly with HCA stakeholders to translate complex healthcare access and pricing requirements into scalable application features, serving as the primary engineering point of contact on a 5-developer Agile team

Software Development Engineer in Test

05/2016 – 01/2020

- Built and maintained a suite of hundreds of Selenium-based automated tests covering critical end-to-end user journeys through the purchasing and access control platform, executed against bi-weekly releases
- Designed regression testing frameworks that validated application stability across rapid release cycles (weekly to bi-weekly), consistently preventing production regressions from reaching HCA's nationwide user base
- Partnered with engineers to identify root causes of test failures, improve coverage of role-based access scenarios, and increase confidence in deployments across a complex, permission-driven application

JCG Land Services – Nevada, IA

System Administrator

05/2015 – 05/2016

- Designed and implemented foundational IT and system infrastructure for a growing organization, establishing reliable, secure systems from the ground up
- Migrated business data from fragmented, unstructured storage to centralized, secure digital systems, improving data integrity and accessibility
- Improved system performance and employee productivity through modernization and automation initiatives

ICS Advanced Technologies – Ames, IA

Tier III Support Technician

02/2011 – 05/2015

- Expanded and supported a tiered technical support organization, including integration of an external call center for first-line triage across large-scale municipal deployments
- Diagnosed and resolved advanced network and hardware issues in complex, large-scale environments
- Developed monitoring and reporting tools to measure network health, uptime, and operational performance

Skills

Languages & Frameworks: C#, ASP.NET Core, .NET Framework 4.8, ASP.NET, FastAPI, Flask, JavaScript, PowerShell, Python, Razor Pages, React

Architecture & Security: Role-Based Access Control (RBAC), Authentication & Authorization, Audit Logging, Microservices, REST APIs, HIPAA-aligned Access Controls

Databases & Data: SQL Server, PostgreSQL, Entity Framework, SSIS, Query Optimization, Stored Procedures

DevOps & Cloud: CI/CD, Git, Jenkins, Azure (migration, database & identity), Logging & Diagnostics

Testing & Quality: Selenium, NUnit, Postman, Swagger, End-to-End Test Automation, Regression Testing

AI & Developer Tools: GitHub Copilot, Claude Code

Practices: Agile/Scrum, Remote Collaboration, Technical Leadership, SDLC

Education & Certifications

Iowa State University – Ames, IA

Graduated 2014

Bachelor of Science – Computer Engineering

Microsoft Certification

Received 2026

AZ-900 : Azure Fundamentals

ISTQB Certification

Received 2016

Certified Tester Foundation Level
